Art Unit: 1773

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language.

This claim is an omnibus type claim.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2-4 depends from claim 1 which requires flexible polyester base film. Therefore in claim 2, "base film is a polyvinyl chloride"; in claim 3, "base film is an aluminum foil or a tin metal foil" and in claim 5, "base film can be replaced by any other flexible chemical film, thin paper, thin metal foil or thin cloth" renders claims confusing and indefinite.

Claim 1, lines 12-14, the Markush group "selected from group consisting for --- ZrO<sub>2</sub>" is improper. The proper Markush group is "selected from the group consisting of Al<sub>2</sub>O<sub>3</sub> --- and ZrO<sub>2</sub>".

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as

Art Unit: 1773

to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 1 and 3 recites the broad recitation polyester film and polyolefins film, respectively, and the claim also recites PET (i.e. polyethylene terephthalate) film and film such as polyethylene, polypropylene film etc, respectively which is the narrower statement of the range/limitation.

4. Applicant is requested to Note that the claims directed to a protective film having flexible base film of claims 2, 3, 4 and 5 will be restricted out. Also, claim 6 when directed to a protective film comprising a mixture of ceramic material and a base material of claims 1, 2, 3, or 4 will be restricted out.

5. Claim 6 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

6. Claims 7 and 8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent

Art Unit: 1773

claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

8. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jones (U.S. Patent 3,442,686).

Jones discloses a plastic packaging film comprising base polyethylene terephthalate film having thickness of 1 mil (i.e. 25.4 microns) (col. 3, line 36) coated with a coating comprising zirconium oxide at thickness of not more than 2 microns (col. 3, lines 14-16; Example 14, ZrO<sub>2</sub> coating thickness of 1.6 microns).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D.S. Nakarani whose telephone number is 703-308-2413. The examiner can normally be reached on Tuesday-Friday from 7:00 am to 5:30 pm.
